

About us

The Delta Vision Project is composed of nonprofit organizations led by and serving Black, Indigenous and other People of Color (BIPOC) communities specifically to build the capacity of community based organizations.

By building the community power of those most impacted by racial injustice and by supporting organizations that are led by and serve our communities, we believe we can transform systems and become a more racially just society.

Our shared values

We partner with and support other BIPOC-led and -centered organizations that share values grounded in community, organizations that are:

- actively working toward racial equity and collective liberation,
- in authentic relationships with community, and
- advocating for improved systems and resources in the nonprofit sector.
